

Services Overview

With over 15 years experience in implementing Agresso Business World based solutions Integra Associates is the largest and most established independent Agresso consulting practice in the UK

Integra works closely with all its clients to create business systems solutions that deliver real business benefits and high returns on investment.

Our objectives to deliver the highest quality of services with a strong empathy for our clients' complete business needs remain at the heart of our own business development and service delivery.

We are able to providing a wide range of experience and skills to assist with business process changes through to systems implementations and user support.

Integra maintains a strong team of highly experienced consultants to help you get the most out of your financial business systems.

Our wide ranging services are delivered with a flexibility that allows us to work in harmony with your own project teams.

So whether it's managing the project, using our specific skills to support your own team or delivering against defined terms of reference, we are confident we will add value to your project. Case studies are available to illustrate how we have worked with our clients to realise successful projects as diverse as new implementations, technical upgrades, sophisticated integration projects or simply ensuring end users are retrained.

Consultancy expertise and services from Integra include:

Business Consultancy

The foundations of any successful solution are effective business processes. Integra has the expertise to contribute to process improvement programmes that together with sound ABW design create highly efficient total solutions.

Project Management

The planning, monitoring and managing of a project is vital to its success and Integra use their many years of management experience, both to manage clients' projects or to support the client's own project managers.

ABW Application Consultancy

The independent and impartial focus of Integra's consulting team combined with our experienced background allows us to provide objective advice and practical support for our clients' implementations. Services are delivered flexibly to meet our clients' resource and timescale requirements and so ensure they benefit by receiving best practice delivered in a cost effective way.

Financial Expertise

Many of our consultants are qualified accountants who bring a wealth of practical financial management experience.

Technical Consultancy

ABW solutions provide a strong environment for growth and business change. But this requires effective and robust technical configuration and support delivered in the appropriate timeframe to maintain system integrity. Integra is able to provide such support with the reassurance that our clients benefit from a much wider technical knowledge base and experience of Agresso implementations.

Just some of our customers comments about us:

'By introducing Integra consultants into our internal project team we gained a useful breadth of business systems and implementation experience. With the benefit of this shared knowledge we were clear in selecting the best use of Agresso to meet our specific needs.'

'Using an Integra Project Manager instilled a greater feeling of confidence and control in our project.'

'Their knowledge, advice and commitment was invaluable in re-designing the ledger and reporting systems.'

Integra offer ABW Expertise in:

- General Ledger
- Accounts Payable
- Accounts Receivable
- Bank Reconciliation
- Fixed Assets
- Project Costing & Billing
