

Agresso Business World

With over 15 years experience in implementing Agresso Business World based solutions, Integra Associates is the largest and most established independent Agresso consulting practice in the UK.

Integra works closely with all its clients to create ERP solutions that deliver real business benefits and high returns on investment.

The objective of delivering the highest quality of services with a strong commitment to your business needs remains at the heart of our business development and service delivery. We are able to achieve this by offering a high level of experience and a wide range of skills delivered in an integrated and flexible way from project inception to completion.

Integra has a strong team of highly experienced consultants to help you get the most out of your ERP system. Our wide ranging services are delivered in harmony with your own project teams and with a flexibility which maximises cost effectiveness. Many of our consultants are qualified accountants who bring a wealth of practical financial management experience.

“By introducing Integra consultants into our internal project team we gained a useful breadth of business systems and implementation experience.”

So whether it's managing the project, using our specific skills to support your own team or delivering against defined terms of reference, we are confident we will add value to your project.

Case studies are available to illustrate how we have worked with our clients to realise successful projects as diverse as new implementations, technical upgrades, sophisticated integration projects or simply ensuring end users are skilled.

“With the benefit of this shared knowledge we were clear in selecting the best use of Agresso to meet our specific needs.”

Consultancy expertise and services from Integra include:

Business Consultancy

The foundations of any successful solution are effective business processes. Integra has the expertise to contribute to process improvement programmes that together with sound ABW design create highly efficient total solutions.

Project Management

The planning, monitoring and managing of a project is vital to its success. Integra use their many years of management experience, both to manage clients' projects or to support the client's own project managers.

ABW Application Consultancy

We provide a comprehensive range of application consultancy services, delivered by a team with an average of over ten years experience per consultant. Services range from business analysis, and solution design through to system build, support and troubleshooting. Our independent and impartial focus allows us to provide objective advice and practical support for our clients' implementations.

Training

Integra offer a tailored approach to identifying and delivering training that's right for your business needs. We can deliver a flexible program that works for your organisation, encompassing one to one training, technical training, post training support and user manuals and videos.

Technical Consultancy

Our technical services range from a dial in check to ensure your systems are operating smoothly to complete server installations and bespoke development work. We have extensive experience of complex integrations of ABW with other applications and have worked with Unit4 to develop the integration tools on a number of client sites. For peace of mind, we can perform a technical health check of your current system to ensure they are running optimally.

"Using an Integra Project Manager instilled a greater feeling of confidence and control in our project."

"Their knowledge, advice and commitment was invaluable in re-designing the ledger and reporting systems."
